## CLEAN AND GREEN CAMPUS INITIATIVE POLICIES

### Policy statement

The AJIET Clean and Green Campus Policy statement outlines our commitment to maintaining an environmentally sustainable campus environment. It encompasses initiatives aimed at reducing waste, conserving resources, and promoting eco-friendly practices among students, staff, and visitors. Through this policy, we pledge to create a campus that not only supports academic excellence but also serves as a model for environmental stewardship and sustainability in our community.

### Scope of the policy

The scope of the AJIET Clean and Green Campus Policy encompasses all aspects of environmental sustainability within our campus premises. This includes initiatives aimed at reducing waste generation, conserving energy and water resources, promoting recycling and encouraging green transportation solutions, and integrating sustainable landscaping and building practices. The policy applies to all members of the campus community, including students, staff, faculty, and visitors, and extends to all areas of campus operations and activities. By adhering to this policy, we aim to create a campus environment that not only supports academic excellence but also serves as a beacon of environmental stewardship and sustainability within our community and beyond.

### The environment policy includes the following components:

**Greywater Reuse:** Investigating and deploying systems for treating and repurposing greywater for non-potable uses.

**Water-Saving Practices:** Encouraging water-saving practices in daily activities and providing guidance on responsible water usage. Organizing awareness on saving water to educate students, faculty, and staff. Display of messages on saving water are placed in washrooms and near wash basins.

**Rainwater harvesting:** AJIET is dedicated to environmental responsibility by practicing rainwater harvesting. This involves collecting and storing rainwater to replenish and recharge the groundwater table. Through rainwater harvesting, we aim to create a more

resilient and environmentally friendly campus, fostering a sense of responsibility towards our shared resources.

**Solar Energy:** Installed solar panel lamp post, the lamp posts convert sunlight into electricity, reducing our dependence on conventional energy sources and minimizing our carbon footprint.

**Waste disposal:**

In our facility, various bins have been introduced to manage distinct types of waste effectively.

- A waste management system where wet waste and dry waste are collected in separate bins, ensuring source segregation. This practice facilitates environmentally responsible waste disposal as each type of waste is appropriately managed to minimize its environmental impact.
- Bins have been strategically positioned in designated areas to gather both degradable and non-degradable waste.
- Disposal of chemical waste is also done with great care in Chemistry and Environmental Laboratories.
- Electronic waste (e-waste) is gathered in designated bins within relevant laboratories.

**Environment for physically challenged**

The environment policy for disabled students has been meticulously planned to ensure accessibility and inclusivity throughout the campus. This includes the implementation of wheelchair-friendly ramps, strategically placed lifts, washrooms, restrooms and the creation of an obstruction-free environment to facilitate ease of movement for all individuals. Through these measures, we aim to provide a supportive and welcoming campus environment that empowers disabled students to fully participate in academic and social activities.

**The management of A J Institute of Engineering & Technology reserves the right to amend the policy issued as and when it is required.**
