The Major Project is a crucial component of the curriculum designed to provide students with hands-on experience in their field of study. This project typically spans the final year of the program and involves the application of theoretical knowledge to real-world problems. This is carried out in final year as mentioned in the syllabus.

The internship program is designed to provide students with practical experience in a professional setting. Internships are typically undertaken during the final year in 18Scheme & pre-final year in 21Scheme and are integral to bridging the gap between academic knowledge and industry requirements.
