To,

The Principal,
AJIET, Mangaluru

Subject: Requesting Permission for Industrial Visit for 3rd Year Students.

Respected Sir,

I am writing on behalf of the Department of ISE to seek your gracious permission to organize an industrial visit for our 3rd Year students. Such visits are integral to our curriculum as they provide practical exposure and real-world insights that complement the theoretical knowledge gained in the classroom.

Details of the proposed industrial visit are as follows:

Date: 22-06-2022 - 24-06-2022

Venue: ITCHAMPS Software Pvt. Ltd, Mysore

Doddabetta Tea Factory, OOTY

Purpose: The visit was to provide students with a hands-on learning experience, allowing them to observe and understand various concepts in the industry settings.

Your approval will significantly benefit our students.

Students moved to the seminar hall area, where the IT CHAMPS management explained the students about products developed by the company and the technical head of the company explained the students about the programming aspects of their product and also discussed about the SAP Applications and their market opportunities.

The technical head and HR manager of the company spoke about the market opportunities of the SAP applications, other IT services and the training process of their company. At the end of the session, students were given refreshments.

At the end of the visit students learned:

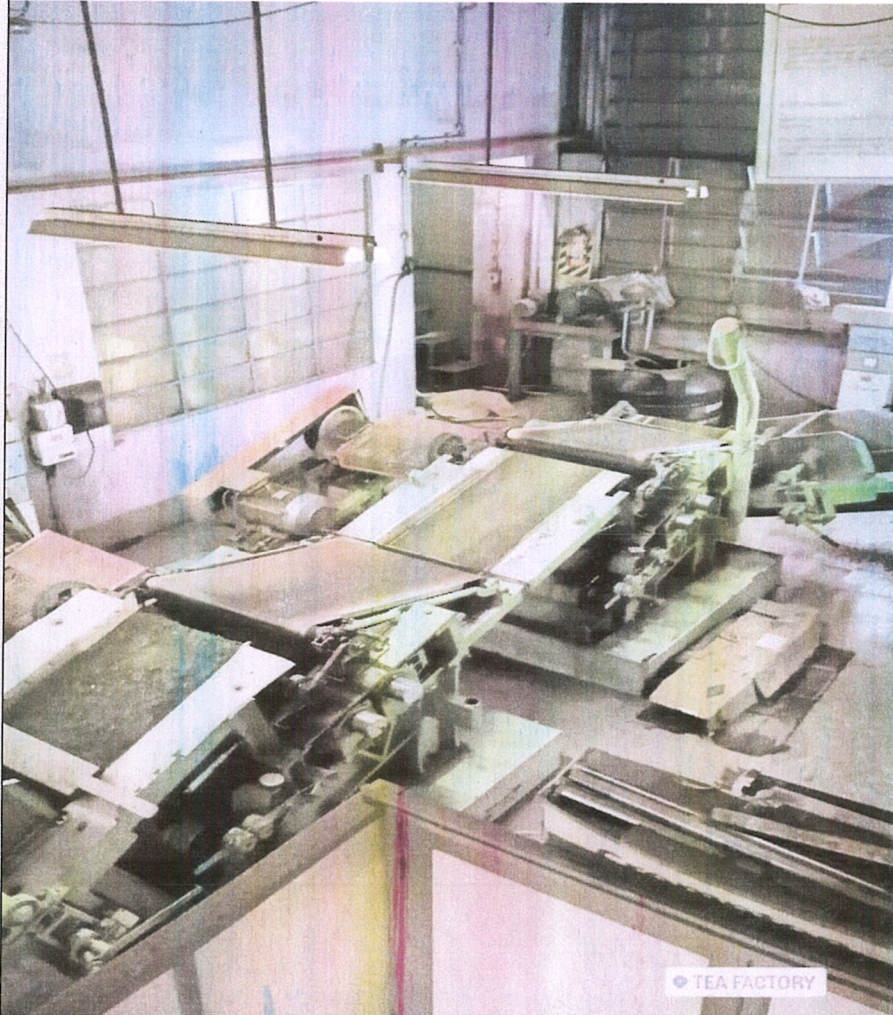

- If recognition is required in the industry, hard work is necessary

Department of Information Science and Engineering

- With hard work and dedication, anyone can become great
- To become great students should not compromise, take no shortcuts and to never copy anyone
- Always keep trying to better yourself
- Keep learning new things because there is no limit in acquiring knowledge

INDUSTRIAL VISIT TO DODDABETTA TEA FACTORY, OOTY

The students visited Doddabetta Tea Factory Ooty on 23rd June 2022. The Tea Factory in Ooty is also well equipped to produce tea of different qualities. It also aims at exporting to large international markets and hence the entire tea manufacturing process is well planned and highly optimized and grounded up to churn out exceptionally good edible quality of tea that taste fresh and is then only retailed in numerous market places in India and Abroad. On the first floor of the Ooty Tea Factory, students notice a chain of 5 CTC high speed stainless steel rollers Machines that run in opposite directions where the tea leaf are passed through for the cutting, twisting and curling process. The tea leaves are then spread over a fermenting floor in beds measuring 10 feet in length and 4 feet in width and not more than 3 inches thick. During fermentation process, the tea leaf reacts with the oxygen in the air that causes the change in colour from green to copper red. It is during this process, when at a particular point; the tea leaf emits a fruity fragrance which indicates that it is ready for drying.

Department of Information Science and Engineering

The dried tea leaves are passed through an elevator and into the Fibromat machine within the Ooty Tea Factory to remove the fibre in the tea. There are two sifts or mesh placed at the end of the Fibromat machine helps to separate the dust from the tea leaves. The tea leaves are then graded as BOP, BOPF, BP and Pekoe in accordance to their granular sizes. Similarly, the tea dust is graded into Pekoe, Red, Super Red and Super Fine dusts in accordance to their sizes.

The students explored the possibility of computerizing the entire process in the tea factory.

Doddabetta Tea Factory And the Tea Museum

INDUSTRIAL VISIT CERTIFICATE

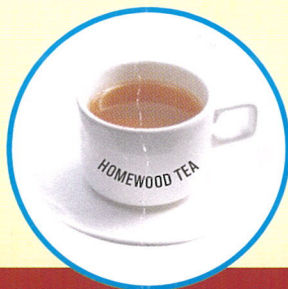

This is to certify that students of A J Institute of Engineering and Technology, Mangaluru ISE Branch (53)

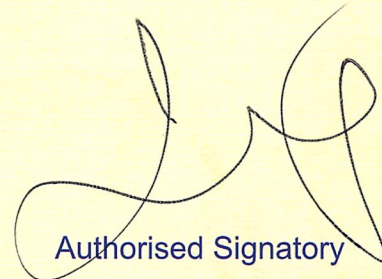

visited The Doddabetta Tea Factory and the Tea Museum on 23-06-2022

They were given first hand information of the entire tea history and processing. They participated in a guided factory tour in which the history of tea and the different stages of tea processing like withering, crushing, cutting / tearing / curling (CTC), shaping, fermentation, drying, cleaning and grading was explained to them. The students evinced keen interest in knowing all aspects about tea manufacture.
