Summary Report on Corrective Measures - 2
(5th Semester, AY:2019-2020)

After the completion of IA-2 test in the 5th semester, a good amount of effort put by the teachers and the students were appreciated as the number of slow learners has been drastically reduced when compared to IA-1 test. Around 6 students were identified as slow learners in which they were also called for the meeting and discussed about their issues faced with their subjects and the reason for scoring less marks as well as less attendance. The students were advised to meet their subject teachers regularly and clear their doubts with the concept taught in the class on a weekly basis. The HOD, class advisor and the faculty mentors suggested the students not to miss any class and to be little more serious with the academics.
