Resource person started the session with explaining Agile. Agile is a process by which a team can manage a project by breaking it up into several stages and involving constant collaboration with stakeholders and continuous improvement and iteration at every stage. The Agile methodology begins with clients describing how the end product will be used and what problem it will solve. Agile is the ability to create and respond to change. Resource person then highlighted on scrum framework. Scrum is a simple framework for effective team collaboration on complex products. Later the concept on Devops were explained, it is a culture which promotes collaboration between development and operation team to deploy code to production faster in an automated and repeatable way. Devops is a combination of two words Development and Operations. These topics are very useful for the students with respect to academic and industry perspective

Dr Antony P J, HOD-CSE, welcomed the gathering, Mrs Snitha Shetty, Asst Prof., CSE, introduced the speaker after which session was
